

SSI Specialty Course

Night/Limited Visibility Diving

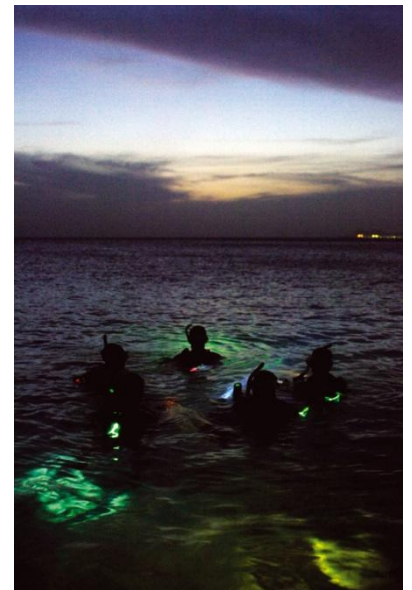

Day or Night, Limited Visibility can be an adventure. Just because the Visibility is limited doesn't mean your diving is!!

When the sun goes down and everything becomes dark that favourite dive sight you know like the back of your hand takes on a whole new life. Creatures you see during day light hours tuck themselves away and new nocturnal creatures come out from there hiding places to roam around in the darkness creatures you didn't even know were there!! Believe it or not Night Diving can be one of the most relaxing diving experiences, were the only thing that matters is where and what the beam of your torch shines on.

Your Night / Limited Visibility Course consist of a 1 theory session and 2 boat dives a Dusk dive (as the sun sets) and a Night dive out at Cook Island.

Some Things we cover during the course:

- **Diving and navigation in turbid water**
- **Setting up shore lights, mooring/anchor lights with dive ladder light.**
- **Holding lights to maximize visibility**
- **Locating the boat or shore**
- **What to do if you lose sight of your buddy**
- **What to do if your light goes out**
- **In-depth information about necessary equipment, care and maintenance**
